In the second quarter of FY26, 26 out of 33 counties reported positive year-over-year (YOY) economic growth compared to Q2 FY25, with a statewide 5.9% increase in matched taxable gross receipts (MTGR). Statewide growth was observed across most industry sectors, with the construction industry leading the way. In Q1 FY26, employment, wages, and the number of establishments have also increased YOY at the state level.

San Juan County's MTGR decreased by \$27.4M, or 2.4%, from Q1 FY26 to Q2 FY26, as seen in Chart 1. Still, the amount reported during Q2 FY26 (\$1.09B) was \$34.6M larger than the eight-quarter average (\$1.06B). As seen in Chart 2, the largest industry as a percentage of MTGR was the retail trade industry, which accounted for 29% of the total MTGR during Q2 FY26. This was a slight increase from the industry's 26% share last quarter.

An **establishment**, as defined by the Quarterly Census of Employment and Wages (QCEW) and referenced in Chart 6, is an economic unit, such as a farm, factory, or store, located at a single physical address and engaged in one type of economic activity.

**Gross Domestic Product (GDP)** measures the value of all goods and services produced within a specific area. Changes in GDP from one period to another are important indicators of how the economy is performing. Chart 7 illustrates the YOY percentage change in real GDP for calendar years. Table 2 below details the percentage contribution of each industry to the total GDP for a specific county and how each industry's GDP changed compared to the previous calendar year.
