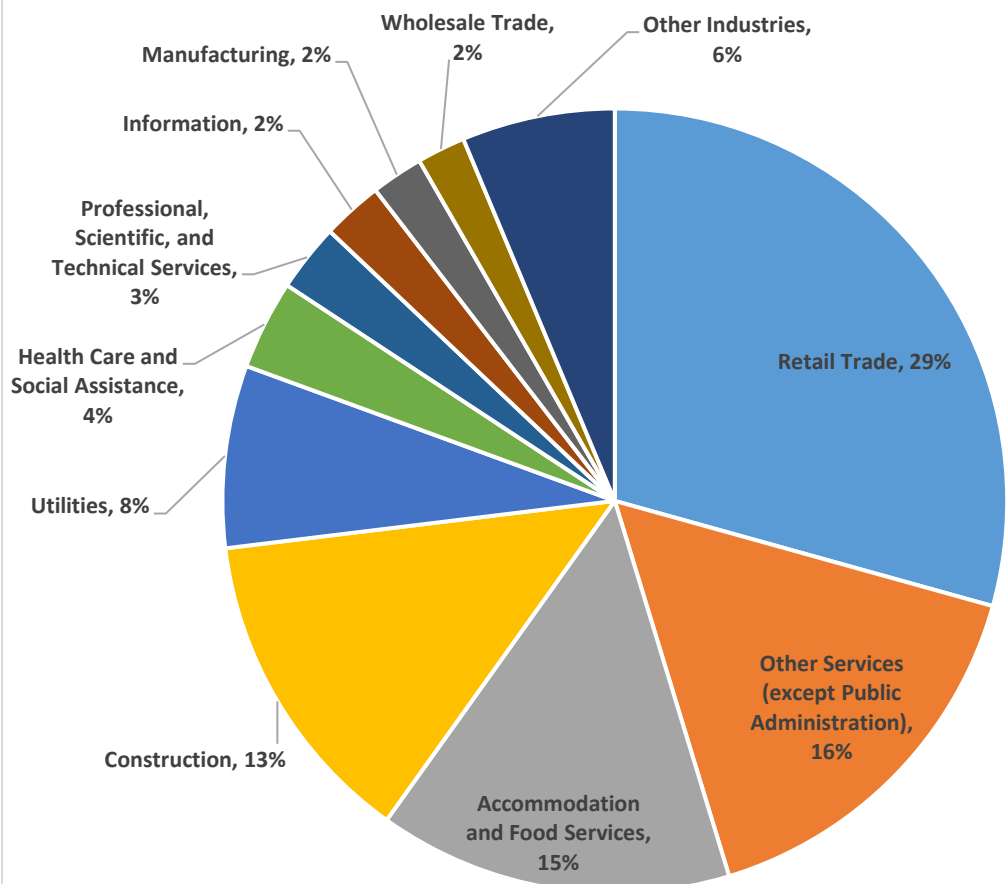

Chart 1. Matched Taxable Gross Receipts Per Quarter

In the first quarter of FY23, 25 of 33 counties saw significant year-over-year economic growth. Statewide economic activity showed broad growth across most industry sectors, with oil and gas and construction leading the growth in gross receipts over the prior year. Concerns like interest rates and inflation have continued, leaving consumer confidence declining on the national level. Despite these concerns, New Mexico has had continued growth, with record-breaking gross receipts.

Over the last eight quarters, matched taxable gross receipts (MTGR), has averaged nearly \$45.9M which is \$11.2M less than the amount reported during Q1 FY23 (\$57.2M). From Q4 FY22 to Q1 FY23, MTGR increased by nearly 9% or just under \$5M. With this increase in quarterly MTGR, Quay County has an upward trend over the last eight quarters. As seen in Chart 2, the other services and retail trade industries have accounted for 45% of Quay County's total MTGR.

Chart 2. FY23 - Q1 Industry Size by Matched Taxable Gross Receipts

**Matched Taxable Gross Receipts (MTGR)** are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Table 1 shows that, when comparing year-over-year (YOY) MTGR, the largest contribution came from the other services industry. This industry accounted for over 45% of the total YOY increase that Quay County reported. All but 4 industries reported a YOY increase. The largest decline was reported by the manufacturing industry. This industry contracted by \$226K or 16% when comparing the two periods.

The amount of quarterly gross receipts taxes (GRT) collected during Q1 FY23 (\$1M) was 27% more than the amount collected during Q4 FY22 (\$820K), as seen in Chart 4.

Chart 6. Establishment Year Over Year % Change

An **establishment**, as used in the QCEW and subsequently Chart 6 and Table 2, is an economic unit, such as a farm, factory, or store, which produces goods or provides services at a single physical worksite and engaged, predominantly, in one type of economic activity.

**Gross Domestic Product (GDP)** is the value of all goods and services produced in an area. The percentage that GDP grew (or shrank) from one period to another is an important indicator as to how the economy is performing. Table 2, below, shows the percentage of GDP each industry accounts for in the total GDP, in a specific county and the state. The chart also compares the county to the entire state of New Mexico, by showing the impact of specific industry sectors on the county's GDP compared to that of the whole state.
