Chart 1. Matched Taxable Gross Receipts Per Quarter

Thirty of 33 counties continued significant year-over-year economic growth in the third quarter of FY22 with statewide growth of 15% for all industries compared with the same quarter two years ago. Growth was also broad across industry sectors, with oil and gas and arts, entertainment and recreation leading the growth in gross receipts over the prior year. COVID-19 continues to disrupt some supply chains, and rising inflation poses a risk of slower national economic growth; however, the immediate outlook is for continued strong growth in New Mexico.

Bernalillo County's matched taxable gross receipts (MTGR) declined slightly in Q3 FY22, compared to Q2 FY22, shown in Chart 1. From Q2 FY22 to Q3 FY22, MTGR declined by \$281M or nearly 5%. Despite this slight decline, the amount reported during Q3 FY22 (\$5.72B) was the second highest amount over the last 16 quarters, behind only Q2 FY22. Table 1, on the next page, shows an increase of \$812M from Q3 in FY21 to FY22 of the same period.

Chart 2. FY21 - Q3 Industry Size by Matched Taxable Gross Receipts

Matched Taxable Gross Receipts (MTGR) are the best tax data available to show underlying economic activity. The data collection process matches a tax payment with reported receipts for each taxpayer by industry.

Chart 6. Claimants Receiving Unemployment Benefits Per Week

* Data in weeks with low claimant amounts may be withheld to avoid disclosure of confidential information

Data in Chart 6 includes claimants receiving payment for standard unemployment insurance, pandemic unemployment assistance, pandemic emergency unemployment assistance, extended benefits, and trade readjustment allowances. Data are unofficial and subject to change. Extended COVID-19 related federal unemployment programs ended September 4th, 2021. This explains the decrease in the number of claimants shortly after this date. Data can be considered a three-week average.

The U.S. Census Bureau counts each resident of the country, where they live on April 1, every ten years ending in zero. The Constitution mandates the enumeration to determine how to apportion the House of Representatives among the states. The 2020 Census attempted to count every person living in the United States and the five U.S. territories. It marked the 24th Census in U.S. history and the first time that households were invited to respond to the census online.
